Kyle Cieskiewicz

Career Cover: I am a senior full-stack web developer who can easily adapt to any technology required for your projects. I have proven knowledge of the requirements for web applications and try to provide the best solution for each scenario to allow your web product to grow and thrive. I got master's degree in Computer Science and Engineering and have since been working for software companies of all sizes from all around the globe. Currently, I enjoy working as a full-stack architect in React/Redux, Node, JavaScript, AWS, Python projects, where my experience and my deep understanding of architecture and theory are most impactful.

Technical Skills:

- Highly skilled: HTML5, CSS3, JavaScript, Bootstrap3/4, responsive UI
- Highly skilled: JSON, XML, REST API, Google API, AWS, Social APIs
- Highly skilled: React.js, Angular.js, Node.js, Vue.js, Python.
- Highly skilled: Restful API (SOAP, REST, JSON, Web service Security, etc.)
- Highly skilled: SQL, database, MogoDB, Adobe Photoshop, Adobe Illustrator, Adobe XD, Figma, Git, Sketch

Sample Projects:

Front-end: Angular.js, (Version 7~11), Angular hook, REST API by Angular. React/Redux, Next.js, Vue.js. JavaScript, TypeScript, Material Design, Bootstrap4/5, PHP, responsive UI	https://www.choicehotels.com/ https://www.bcnorthernlights.com/ https://www.thethinkingtraveller.com/ https://wbstaging.z20.web.core.windows.net/#/account/login http://www.yearofmoo.com http://www.worktile.com http://www.astutesoft.co.za http://www.kanui.com.br https://www.paytm.com https://www.xplenty.com http://gohuh.com/music http://cupcakeipsum.com http://www.fluid.ie/angular/calculate https://waitwhile.com https://invoice-generator.com
Back-end: Node.js, Python, Mysql, MongoDB.	
AWS, payment APIs, JSON, XML, REST API, Google API, AWS, Social APIs, Git. Docker, CI/CD	

WORK HISTORY:

Apex/First Energy- Remote

05/2022 - 01/2023

Full-Stack Developer(React, Node)

- Develop custom solutions and interfaces and **React/Redux** leveraging the Adobe platform, using Maven and implement new responsive **frontend** features/components and state managed solutions for all devices based on provided business requirements and designs that satisfied performance and scalability
- Architect and implement new responsive **frontend** features/components and state managed solutions for all devices based on provided business requirements and designs that satisfied performance and scalability
- Developed subsystems using Java and **Javascript** as MVC full-stack software products and influenced the architecture for the product ecosystem, from conception to market.
- Captured requirements, detailed designs, verified and validated test cases, code reviews and other supporting artifacts as defined by the SDLC
- Design back-end software components in Java into new and existing applications, specifically web applications and cloud components, through implementing interfaces, REST and other APIs, data structures, and other common design patterns.
- Worked in CI/CD Agile Scrum environment with bi-weekly sprints, and daily scrums. Participated in sprint planning and assisted with backlog.

Judge Group/JP Morgan Chase- Remote

07/2021 – 04/2022

MERN,Python Developer

- Integrated existing software using **React** into new or modified systems or operating environments.
- Collaborated with business and technical teams to deliver new features and capabilities to meet desired business outcomes.
- Worked on backend using **Python, Django**
- Transform business and functional requirements into technical solutions using **Angular9**.
- Analyzed specific and implied requirements and collaborated with other members of the development team to design, build and deliver features to meet those requirements
- Worked with cloud infrastructure environments and containerization technologies
- Booking site using **React (React hooks main feature), Django** for back-end

Pacsun - Remote

08/2020 – 06/2021

Software Developer(React, AWS sever)

- Ecommerce website development - Angular , Node including .
 - Integrating 3rd party APIs – Node, Angular Front-end, live coding
 - Moved the sites & APIs using **React** frameworks such as **Next.js**.
 - Worked with internal teams to implementing REST, HTTP, XML integrations with third-party systems
 - Identified production issues with existing services and designed or developed scalable microservices.
 - Improved performance on back-end integration by transitioning to Retrofit working with RxJava and parsing JSON objects with GSON.
 - Participated in ongoing initiatives to improve processes and establish best practices.
 - Implemented MVVM architectural design pattern, transitioning code from MVP to MVVM.
 - Worked with handling multi threads to receive and update calls from web server (Service and Broadcast Receiver)
- Involved in designing the logical flow for the application for different components.

Collabera/Citi- Dallas, TX

01/2019 – 07/2020

Full-Stack Developer

- Exposure to Agile, DevOps Toolchain methodologies, to develop and implement internal systems, processes, and best practices designed to increase productivity in cloud
- Hands on experience of SQL, database and persistence frameworks: Oracle, JDBC, JPA, Hibernate, Object / Relational Mapping, Query performance tuning
- Worked with bash/shell scripting in Linux environments
- o Hands-on Design and development experience using Java with web services, microservices and Restful API (SOAP, REST, JSON, Web service Security, etc.)
- o Writing code, unit tests, and build/deployment scripts
- o Analyzed complex problems and implement solutions and/or workarounds
- o Engage in and improve the whole lifecycle of services—from inception and design, through deployment, operation and refinement.

Used frontend technologies such as **Angular** and **React** to enable backend integration through Capabilities and REST APIs (microservices) over HTTP(s).

Bost Tornado Shelters/Around Back Storages-

03/2014 – 08/2016, 01/2018 – 12/2018

Consultant/Manager

Managed SEO, websites, re-targeting, and other digital marketing channels such as Facebook, etc.

DevMountain- Dallas, TX

08/2017 – 12/2017

Student Developer (**React** Front)

Worked closely with other members on the Front End and design teams to update websites using **React** and internal web tools to make them more efficient and to build new features as needed.

Capitol Hill High School- Oklahoma City, OK

08/2016 – 06/2017

Teacher

Severstal- Columbus, MS

10/2012 – 11/2013

Software Developer

- Developed new features and altered existing code to accommodate growing business needs and integration with new technologies and APIs.
- Web development. Html, Css, BootStrap, JavaScript.
- Participated in the design, testing and/or documentation of new or existing applications, which includes upgrades, enhancements, bug fixes as assigned

TECHNICAL SKILLS

- React	- Angular	- Vue	- JavaScript	- HTML	- CSS
- AWS	- API	- Git	- JSON	- Maven	- Payment APIs
- Node	- DevOps	- Mongo	- SQL	- Social APIs	- REST

EDUCATION

University of Mississippi 2012

Oxford, MS

- Major: Bachelor of Management Inform, Computer Science
